2ND MAJORS AND MINORS

WHAT POSSIBILITIES ARE THERE?

Our students have the capacity to **pursue more possibilities** of cross-disciplinary studies within the standard candidature using their pool of **unrestricted elective units**. They can embark on a second major and/or minors within or outside of NUS Business School. Give it a try!

DID YOU KNOW?

NUS has a grade-free scheme where you can ensure your grades don't impact your GPA for that semester. This allows for our students to transit into university life academically and socially.

BE AN ENTREPRENEUR

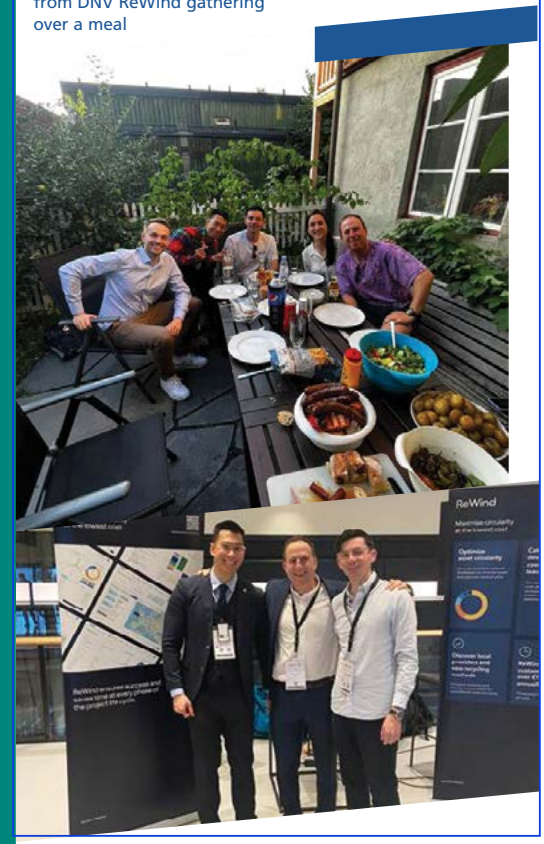

Get a taste of entrepreneurship at NUS Business School, where you get to take center stage in one of our newer majors. Equip yourself with expansive theoretical insights, empowering you to lead change effectively—whether you're venturing into an entrepreneurial startup or navigating the landscape of a large multinational corporation. Previous batches of students, who were just like you, have already launched successful businesses in Singapore, with names like Carousell, Playmoolah, and Moovaz making an impact.

Flip to Page 10, and you will discover the NUS Overseas Colleges (NOC) programme, aimed to cultivate your entrepreneurial spirit. Immerse yourself in this transformative experience — intern in a technology-based startup, while concurrently pursuing part-time courses at reputable universities. It's your opportunity to shape your entrepreneurial journey and make an impact on a global scale.

BRYAN VOON, Year 4 Business Student who went for NOC, Norway.

How has your experience in NOC been so far? And how has it impacted you?
It is difficult to understate how enriching and instructive NOC has been with professional and personal impacts. With the former being to look beyond the usual fields most business students consider when job seeking (e.g., finance, marketing, consulting) while the latter being a future outside of Singapore; a possibility I would not have entertained if it was not for NOC Norway.

Do you have any advice for your juniors applying to NUS Business School and NOC?
Keep an open mind and remember that some of the most valuable sources of learning happens outside of the classrooms with programmes such as NOC which will do nothing but enrich your NUS experience.
